M-1942 AT gums, one battery being assigned to each battalion. The T/O of a gun battery called for two officers, four NCO's and twelve privates who were divided into two gun crews, one to each gum. A crew had one officer as weapons commander, one NCO as crew chief, one NCO as gunner, one private as loader, two privates as ammunition carriers, two privates responsible for placing the gun in and out of action, and one private as chauffeur. At that time, however, the battery was understrength. One was a major who acted as battery commander and the cheefs and one gunner, and three privates, one a gunner and the other two; chauffeurs. The 45mm gun was drawn by a 1½-ton Dodge prime mover. 2. 1st Battalion, 117th Guards Rifle Regiment. This company had three platoons but to the best of my recollection, there was no headquarters platoon. The T/O call for one officer, three NCO's, and twelve privates who were divided up into three gun crews. Each crew had one NCO as crew chief, one private as gunner, one private as loader, and two privates as ammunition carriers. The crews were supplied with Goryunov M-1943, 7.62mm, heavy machine guns. When we were performing guard duty at the check point in Hoenbach on the demarcation line between the US and the Soviet Zones, the platoon was not up to T/O strength. We actually have seed and a super /sio/, and two Willys jeeps. I believe that the motorized equipment was indequate to transport the entire regiment.
